

Otieno: Employees want degrees or certificates that will help them stand out to employers. Suggested considering name changes if appropriate. It could help make students more intrigued to obtain the degree/certificate because they know that is what employers are searching for in a new hire. From his experience at NIU, the top three sought after qualifications seem to be robotics, PLC, and integration.
Glass: Continued interest in a licensed electrician program.

- c. Do you have any recommendations for guest speakers, field trips, teaching resources, potential instructors, new technology? Anything new on a basic level?

Gisselle: Focus on robotics and machine vision.

Otieno: Focus on PLC, HMI, and communication.
